

# Adding a web link to the Home Screen on an iPad

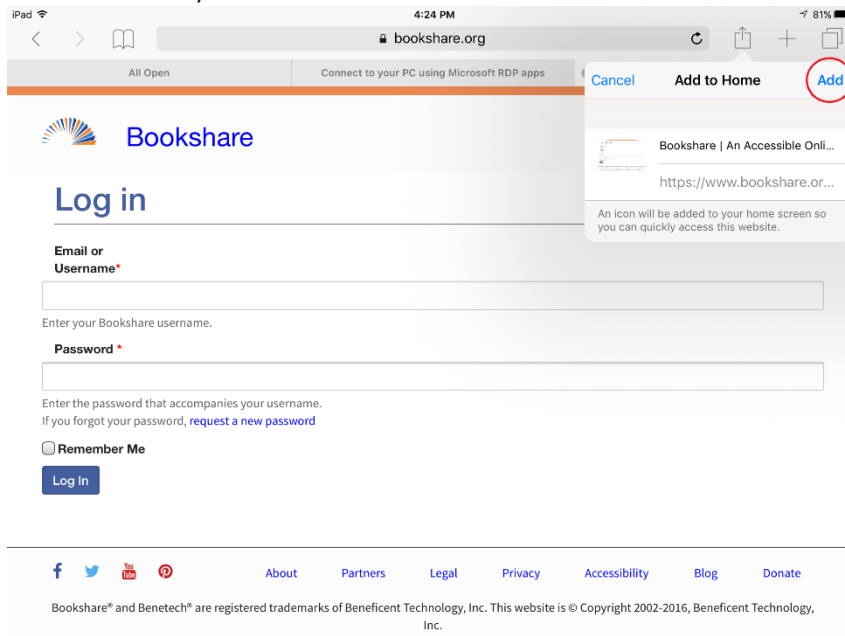

1. Open the Safari Browser
2. Search for or, Type in the desired website. Click to select the website if you searched for one.

3. Next, while still in Safari, click on the menu by clicking on this icon in the upper right corner.

- Then, click on the “Add to Home Screen” option (circled in red in the screen shot shown in step 3 above).
- Confirm that you have the correct website and then click on “Add”

- Your new shortcut will appear on your home screen
